

PULMOVEN DUO

Bronchodilator . Mucolytic . Fluidizing.

The respiratory tract diseases are professional diseases of the equine because of its sport activity primarily for being housed for almost 23 hours per day, with they have to live frequently.

The presence of mucus and bronchial spasms are common features of these states .

Up to now, it did not exist in the argentinian veterinary market a simultaneous formulation to treat respiratory diseases with signs of mucus and bronchospasm .

Sport Horse achieve to formulate Pulmoven Duo, an effective therapeutic weapon , usefull and economic, recovering, this way, the respiratory capacity and deportive attitude.

Pulmoven Duo is indicated for respiratory diseases that present with bronchospasm presence of mucus and / or mucopurulent such as bronchopneumonia , laryngeal tracheitis , bronchitis different evolution (acute , subacute or chronic) , bronchiolitis , COPD (chronic obstructive pulmonary disease) , atelectasis. Sinusitis .

Can also be used as adjuvant in treatment of respiratory tract infections .

Supportive therapy in allergic for housing , food ventado , suspended particles , chip beds , etc. .

Viscosity decrease tracheobronchial mucosa.

Use in Veterinary Medicine

Net Cont : 500 ml

Ready to use

Formula:

Each 100 ml contains :
